IMPROVING PERFORMANCES

*The equipment BASIC distinguishes itself, from other mobile units present into the international market, by its mechanical simplicity, its lightness, its handling, its practicalness.*

Touch screen

|                          |               |               |               |                |                |
|--------------------------|---------------|---------------|---------------|----------------|----------------|
| Power with led console   | 3,3 kW        |               | 6 kW          | 30 kW          |                |
| Power with touch console | 3,3 kW        | 4 kW          | 6 kW          |                | 32 kW          |
| Maximum a/c              | 16 A          | 16 A          | 32 A          | 12 A           | 12 A           |
| Main features            | 40 kHz/110 kV | 40 kHz/110 kV | 40 kHz/120 kV | 100 kHz/125 kV | 100 kHz/125 kV |

Touch screen console main features:

1. 1200 programmable anatomical techniques
2. alphanumeric keyboard in the touch screen
3. radiographic technique at 2 or 3 points
4. patients' data base with radiographic parameters and dose
5. optional: D.A.P. system and thermal printer (just with t.screen)
6. 500 memorizable exams
